

## **THE NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION RECOGNIZES MAHER TERMINALS FOR ITS PROACTIVE ENVIRONMENTAL STEWARDSHIP MEASURES**

April 25<sup>th</sup>, 2013

Maher Terminals, which operates the largest terminal in the Port of New York and New Jersey, recognized NJDEP Assistant Commissioner Wolf Skacel, Ed Choromanski, and their team for continued assistance in Maher's environmental and energy stewardship program by hosting an Earth Day event at their Elizabeth Terminal operations.

The Earth Day event focused on an overview of Maher's current environmental initiatives led by the newly-appointed Maher Environmental Stewardship Subcommittee. Maher Terminals, our executive team, and Environmental Stewardship Subcommittee, in partnership with the EPA, NJDEP, and the Port Authority of NY/NJ, have launched several environmental and energy facility upgrades at its terminal in Elizabeth, NJ. These upgrades, which include a rooftop solar power project, energy efficiency improvements, and implementation of employee best practices, all contribute to Maher's participation in the NJDEP Environmental Stewardship Program.

The NJDEP has therefore recognized the voluntary and proactive measures which Maher has taken in an effort to improve the environment by presenting Maher with a Certificate of Stewardship thus reflecting the Department's appreciation and acknowledgement of the ongoing efforts.

NJDEP Assistant Commissioner, Wolf Skacel and Director of Air & Hazardous Materials Enforcement, Ed Choromanski receive recognition from Maher Terminals during the Earth Day celebration.

NJDEP Assistant Commissioner, Wolf Skacel presents Frans van Riemsdyk, EVP Corporate Development & Strategy for Maher Terminals, with a Certificate of Environmental Stewardship acknowledging Maher's continued efforts towards improving the environment and ensuring a sustainable future.
